◆ *Outdoor Full Color LED Screen* ◆  
◆ *Indoor LED Screen Video Wall* ◆ *Rental LED Screen for Events* ◆ *Shelf LED Screen* ◆ *Small Pixel LED Screen*;

LEKLED enters the market in 2015 with new, independent research & development and patented LED Modules production equipments, which revolutionize the LED Modules production market and brings a significant changes in the industry.

The business owner of Shenzhen Sanco Optoelectronic Co.,Ltd, is from a family business founded in December 2000,Dongguan China. The family business is engaged in the development, production, sale and service of machinery and automated equipment from then. In 2014, the company developed the first generation of LED bulk material placement machines and put it on the market as the inventor. The company owns 5 invention patents and 2 software patents for this equipment, but not surprisingly it won the title of Dongguan high-tech enterprises as well.

With the vision to extend its competitive advantage and to help customer to reach the LED Screen more cost-effectively. LEKLED was born with 20 sets of the newest LED Modules production line, with the goal of striving to subvert the traditional low-efficiency mode of LED modules and displays.

Perhaps we are the most Innovative and most complete manufacturing company LED modules and LED screens.

Innovative because it uses a simplified and fast system of the assembly of the LED.

Complete because, within the same infrastructure is; The department that produces the LED coils, the department that produces the PCB Board and the assembly department of these accessories.

As a result, LEKLED is available to offer you a complete products range of LED Modules and LED Screen and help you to reach the most cost-effective LED Screen Solutions.

- ◆ Outdoor Full Color LED Screen
